

IMPORTANT HEART

HEALTH FACTS

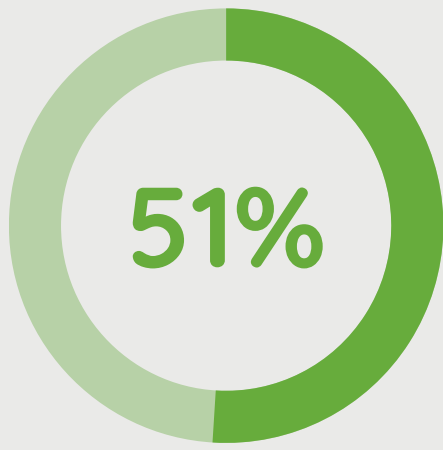

According to the CDC, heart disease is the leading cause of death for men, women, and people of most racial and ethnic groups.

1
Person Dies

34
Seconds

One person dies every 34 seconds from cardiovascular disease

In a 2023 Harris Poll survey, more than half of people did not identify heart disease as the leading cause of death in the U.S.

931,578

Deaths in 2023 were related to cardiovascular disease per the American Heart Association

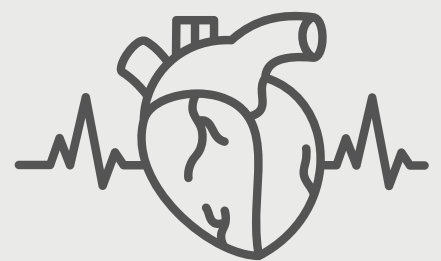

**1 OUT
OF 5**

Deaths are from Heart Disease

DID YOU KNOW...

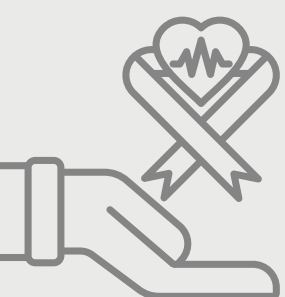

A Coronary Artery Calcium (CAC) test done via a low-dose CT scan can measure the amount of calcium in your heart arteries ("calcium score"). Your calcium score provides you with an idea of how much plaque is in your heart arteries and may help predict your risk of a future heart attack.

CONTACT US TODAY TO SCHEDULE YOUR FREE HEART SCAN COURTESY OF OUR EXCLUSIVE "HAVE A HEART" PROGRAM

No physician orders or referrals needed
